

Keeping your reviews current

Your rating and review count only change when you change them. Once a month is a good habit.

Nothing updates itself.

Google no longer lets us fill your numbers in for you. What shows on your listing is what you typed, until you type something else.

Do it when you confirm your pin.

Every month the profile asks you to confirm your pin. The same reminder says to check your review numbers. Two minutes, once a month, and your listing never lags your page.

1 Open your profile and find the card under **Your reviews elsewhere.**

The monthly reminder email and the line at the top of your profile both link straight to it.

2 Press **Open my Google page**, read the two numbers, and type them in.

Your Google page opens in a new tab. Copy the rating and the review count into **Your rating out of 5** and **How many reviews**. Facebook and other sites: open their page from the link you saved and do the same.

then Copy link. That takes an RV owner straight to your page with your rating and reviews on it.

Your rating out of 5

4.9

How many reviews

114

Open my Google page

Read your rating and review count off your Google page and type them in the two boxes above. They show on your listing as soon as you save.

Not saved yet.

Press Save changes at the bottom of this page and your rating goes on your listing straight away.

Save changes **See my listing**

See my page **Something wrong?**

3 Press Save changes.

The new numbers are on your listing at once. Somebody here checks typed numbers against your page now and then; if they no longer match, they come off until you correct them, and the card says what we saw.

<https://www.facebook.com/exam>

Your rating out of 5

5

How many reviews

60

These did not match your page when we looked, so your listing shows the link but not the numbers.

What we saw: Your Facebook page shows 4.7 from 38 reviews, not 5 from 60. Correct them and save, and they show again.

Add a reviews page

Paste links however they come. We take off the bits that are tied to your own account, which would otherwise send people to a sign in screen instead of your reviews. It is still worth opening your own link in a private window once, to see

Something wrong?

4 Had a Google rating filled in for you before? Type it in yourself by October 8.

Until then the old numbers stay on your listing. After that they come off, and your listing shows the Google link with no number until you type them in. The card says this in amber while it applies.
