

Pausing your listing for vacation

One switch takes you off the map. The same switch puts you back. Nothing else changes.

Billing continues while you are hidden.

Hiding is not cancelling. Your subscription runs as normal, so the day you come back you are on the map again with one press.

Owners simply do not see you.

No pin, no row in the list, and your page says the listing is not on the map right now. Nobody calls you on a beach.

1 Sign in and open your profile.

Go to yellowpagesrv.com, press Sign in, then the green Face ID or fingerprint button if you have set one up, or type your email and use the code or link that arrives.

 **Yellow Pages RV** [Help](#)

Tech sign in

No password. Your face or fingerprint if you set that up, or your email and a link or a code.

Sign in with Face ID or fingerprint

One touch, nothing typed, if you set up a passkey on this device. Not inside Facebook's or Instagram's own browser, and best not on a shared computer.

or with your email

Feedback

2 At the top of your profile, switch on Hide me on the map for now.

It saves itself; there is nothing else to press. The status above it changes to **Hidden by you** right away.

On the map

Credentials verified

Owners in your area can see you right now.

☒

Hide me on the map for now
This is the only switch. Off takes your listing and your pin off together, and on brings them back. Your subscription keeps running either way and you keep being billed.

This listing costs you nothing.
It was set up for you, so there is no subscription and nothing to cancel. Everything else on this page works exactly as it would for anybody else.

There are a few new things to fill in.
We have added your town, the brands you specialise in, inspection pricing, a lot more kinds of work, and your own page that search engines can read. Going back through takes a few minutes and it is what decides whether owners find you. The dark boxes below explain what each part does for your business. Press

Something wrong?

3 Several technicians and only one away? Check Take this pin off the map for now on that one instead.

It is at the bottom of each technician's card under Your technicians and where they work. Then press Save changes. The others stay on the map.

How far you travel for an inspection (miles)

Same as above

Leave this empty if it is the same number. An inspection is booked ahead, so plenty of technicians will drive further for one than for a repair. When an owner asks the map for inspectors only, this is the circle they see instead of the one above.

Miles from your pin is right for nearly everyone.

[Draw the area on the map instead](#) if a circle promises the wrong thing: a mountain pass that makes thirty miles a two hour drive, or a state line you are not licensed across.

☐ **Take this pin off the map for now**

This hides the pin and nothing else. Your subscription keeps running and you keep being billed as normal. If you want to stop paying, cancel under Email and billing further down, which is a different thing entirely.

4 Back home: switch it off again, or uncheck the box and save.

You are on the map the same moment.

? Still stuck?

If the switch will not put you back on, the status at the top says why: usually a payment that did not go through. Stopping the subscription altogether is under Email and billing, and your listing stays up until the end of what you paid for. Anything else, write to support@yellowpagesrv.com.
