

The list view

The same technicians as the map, as a plain list you can scroll, nearest first.

Every one of them, not just the ones on screen.

The map shows what fits in the view. The list shows all of them, however far, so it is the place to look when nobody is close.

Your filters carry over.

Anything you checked under Filters still applies here. Clear them on the map if the list looks short.

1 Press List, next to Filters at the top of the map.

The list fills the screen. **Map** at the top left takes you back.

2 Type a town and pick it, or press Near me, and the list sorts by distance.

Each row then says how many miles away they are, their town, whether they are mobile or a shop, and what they do. Type a state on its own to see everyone in that state.
